Abstract

In this study we attempt to answer two questions: "What are the major factors and sub-factors that mainl project management?" and "What are the relationships among these factors?" An integrated framework wa to assess project management success factors in developing countries. This framework discussed the most least important factors affecting project management. The framework was applied on a sample of 182 proj; questionnaire consists of 7 categories; 11 sub-factors each. The results show that for all projects; Size, Du Value of the project is the most important factor, whereas in large and medium projects; Value of the proje most important factors, in small projects; Economic environment and budget management are the most in factors, in civil projects; Size, Duration and Value are the most important factors and in Electro-Mech. proj Economic environment and budget management are the most important factors
